Academy of Nutrition and Dietetics Pocket Guide to Pediatric Nutrition Assessment Third Edition

An error has been found in Table 8.9 on page 200 of the Third Edition of the *Academy of Nutrition and Dietetics Pocket Guide to Pediatric Nutrition Assessment*.

The book originally showed that the Schofield equation for estimating resting energy expenditures for males aged 10 through 18 years was $(16.25 \times \text{weight [kg]} + (1.372 \times \text{height [cm]}) - 515.5$.

The corrected row in the table should read as follows:

10-18	Males: $(16.25 \times \text{weight [kg]} + (1.372 \times \text{height [cm]}) + 515.5$ Females: $(8.365 \times \text{weight [kg]} + (4.65 \times \text{height [cm]}) + 200$
-------	---

Thank you to those that brought this error to our attention.
